

Hello there,

As October unfolds, we've got some exciting updates and insights from the FireFly team to share with you. Discover the launch of the **ProSlab 165**, our newest turf harvester, powered by the reliable **TorqueSync™** system.

We'll also look at how the **AMP-L100 electric mower** compares to conventional fairway mowers in sound performance and share tips to help you get the most from your equipment—from using **SmartStart™** for smoother AMP operation to protecting your harvester's engine by avoiding idling at low RPM.

Featured News & Articles

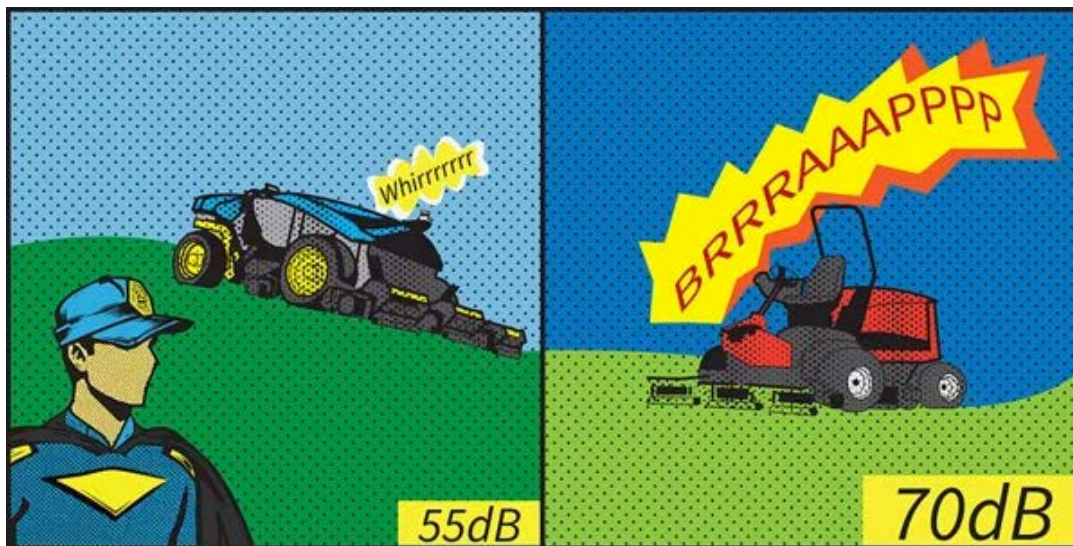

FireFly Automatrix unveils major advancement with the release of the ProSlab 165 turf harvester, powered by the TorqueSync power generation system.

TorqueSync™ isn't just another alternator, it's a servo generator system that captures, recycles, and redistributes every bit of energy to improve both performance and fuel efficiency in real-world harvesting conditions.

Featured Tips and Updates

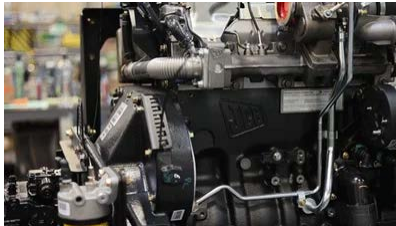

Get the most out of AMP with SmartStart.

SmartStart™ takes robot mower efficiency to the next level by eliminating the need for precise positioning before mowing.

Discover how to protect your turf harvester engine by following these idling guidelines.

Low idle leads to incomplete combustion, soot buildup, and clogged emissions systems — all of which can shorten engine life and cause downtime.
